PHAROS
Pharmaceutical Alerts & Regulatory Observation System

The PHAROS Handbook

How our safety watch works, and how to use it

Prepared for

Dr Sama Mossad

PHAROS IN ONE SENTENCE

It reads the world's medicine regulators for us, finds our ingredients, keeps the original, and lets a person decide.

Where the name PHAROS comes from

ALEXANDRIA, EGYPT

Φάρος

Pharos, an island off Alexandria

280 BC	the lighthouse is built
1,500+	years it stood
1 of 7	ancient Wonders of the World

Pharos was a small island off the coast of Alexandria. Around 280 BC a great lighthouse was built there. Its fire guided ships safely into the harbour, and it stood for more than 1,500 years.

It was so famous that its name became the word for a lighthouse in many languages: *phare* in French, *faro* in Italian and Spanish.

Our PHAROS does the same job. A lighthouse does not steer the ship. **It keeps the light on, so we never sail on in the dark.**

The letters also spell its full name: **Ph**armaceutical **A**lerts & **R**egulatory **O**bservation **S**ystem.

01 The engine

IT RUNS BY ITSELF, DAY AND NIGHT

25
regulators we read

15
languages, never translated

6×
rounds a day, every 4 hours

ONE ROUND, STEP BY STEP

1 Read
Regulators' safety pages, their newsletters in our mailbox, and medical literature.

2 Open
Every new notice and its PDFs. Scanned pages are read too.

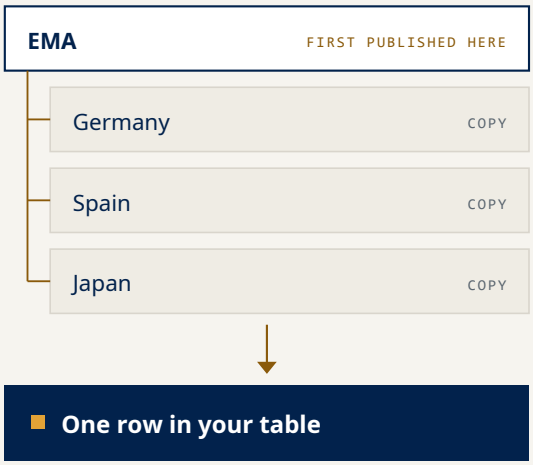

3 Keep
The original file goes into a locked archive. Nobody can change or delete it.

4 Find
Our ingredient's names, in that country's own language. Look-alike drugs are left out.

5 Show and tell
One row in your table, and a Telegram message to the right people.

SAME NEWS, ONE ROW

When Europe publishes a safety letter, many countries publish it again. You see it once.

EVERY MONDAY: THE LABEL WATCH

PHAROS compares the official product leaflets with last week's copy. If a safety section changes, you see the old and new words side by side.

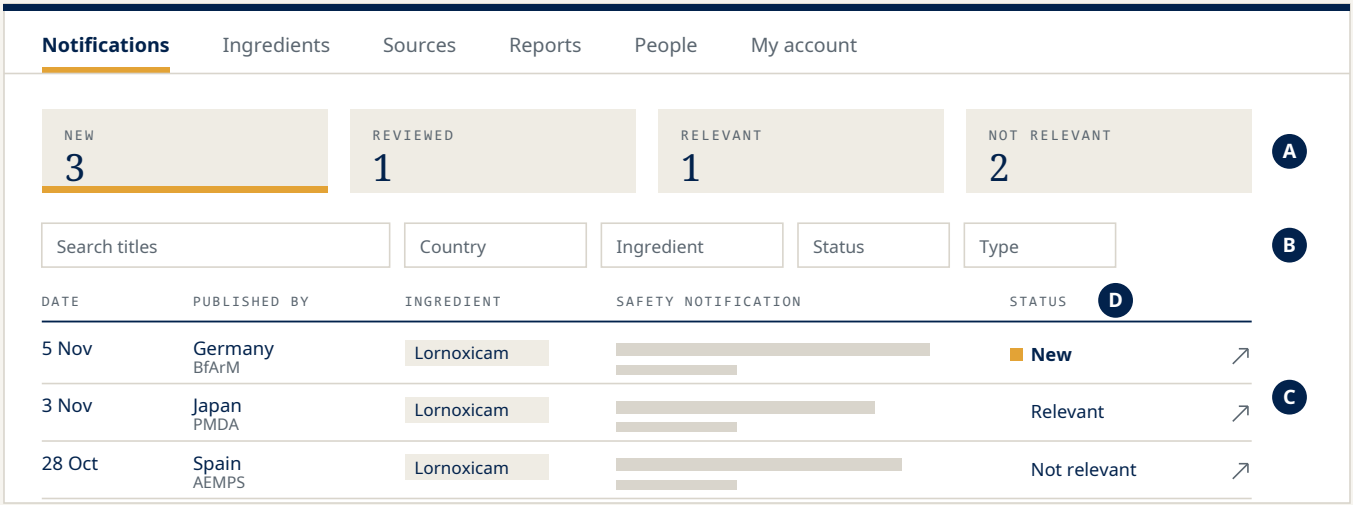

SAFETY NETS

- **Locked archive**
  Every original is kept, and nobody can change or delete it.
- **A health light on each source**
  Working, Needs a look, or Not reachable.
- **A watchdog**
  If nothing is read for 6 hours, an administrator is told.

02 What you see

PHAROS-SATOPHARMA.PAGES.DEV

THE HOME PAGE: NOTIFICATIONS

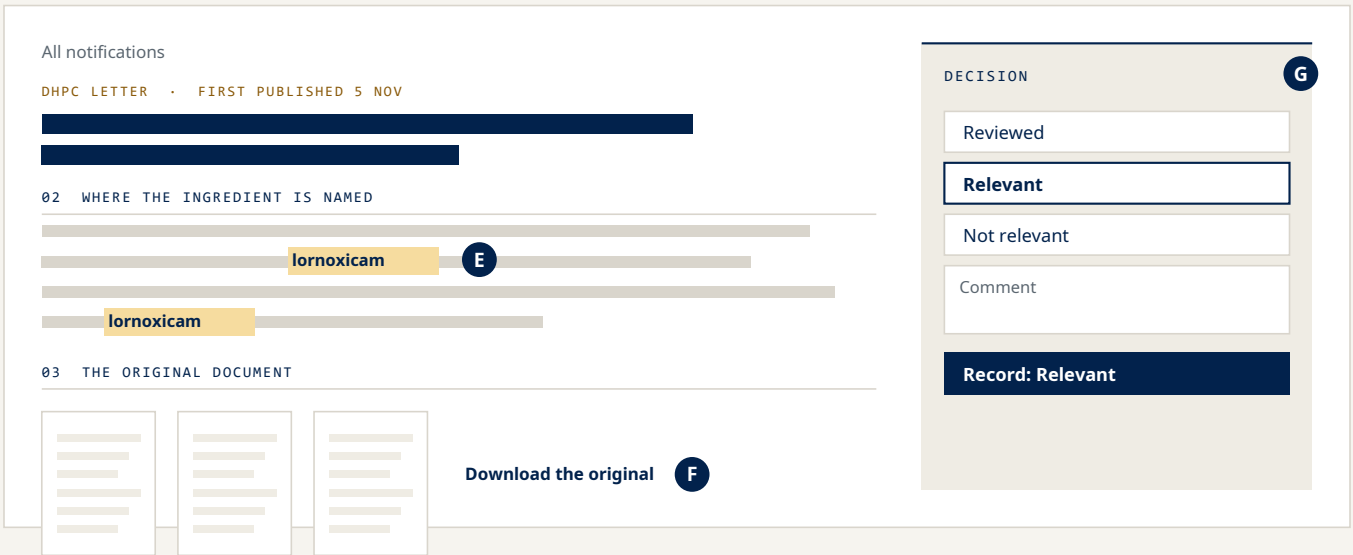

A Counts
Click a tile to see only those.

B Filters
Find what you need.

C One row
One safety news. Click to open.

D Status
New until someone decides.

ONE NOTICE, OPENED

E Highlighted words
Exactly where our ingredient is named.

F The original
The real PDF, kept in the archive.

G Decision
Your choice, with your name and the time.

THE OTHER PAGES

Sign in	Your work email and password. By invitation only.	**Ingredients**	What we watch, and every name we look for.
Sources	Every regulator, and whether it is working.	**Reports**	The monthly PDF and Excel. Proof that we looked.
My account	Connect Telegram. Choose your messages.	**People**	Administrators only: invite people, set roles.

03 How to use it

FIVE MINUTES A DAY

ONCE, ON YOUR FIRST DAY

1 **Choose a password**
from the invitation email.

2 **Connect Telegram**
in My account. Press Start on your phone.

3 **Choose your messages**
in My account, under What I receive.

EVERY WORKING DAY

1 **Open Notifications** and click the New tile.

2 **Open the first row** and look at the highlighted words. Is it our ingredient?

3 **Read the original** PDF, right there on the page.

4 **Record your decision** Reviewed, Relevant or Not relevant.

THE FOUR STATUSES

New	→ Reviewed	→ Relevant	→ Not relevant
Nobody has decided yet.	Read. Decision to come.	It concerns our products.	It does not. Write why.

ONCE A WEEK, ONCE A MONTH

Every week
Look at Sources. Anything not Working? Tell an administrator.

Every month
Open Reports and file the monthly PDF.

WHO CAN DO WHAT

Reader
Sees everything.

Reviewer
Also records decisions.

Administrator
Also manages ingredients, sources and people.

REMEMBER

1 A decision is never edited. You add a new one after it.
2 Comments stay in PHAROS. They never go by Telegram.
3 Every time on screen is Cairo time.
4 PHAROS finds and shows. You decide.

Prepared by hand for Dr Sama Mossad and the pharmacovigilance team of Sato Pharma.
